1 Foreword

JC/T 2408-2017 was issued by Ministry of Industry and Information Technology on 12 April 2017 and has been in force since 1 October 2017.

The JC/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 5 pages in English translation.

2 Scope Preview

This standard specifies the terminology and definitions, requirements and acceptance rules for the general technical requirements of the ceramic pre-cyclone preheater cement pre-decomposition line. This standard applies to pre-decomposition of cement production line cyclone preheater ceramic inner tube installation and acceptance.

JC/T 2408-2017 falls under ICS 81.080, in the field of glass and ceramics industries.

This catalogue holds 206 other JC/T standards in that field.

In this catalogue, JC/T standards carry edition years from 1973 to 2026.

3 About this standard

English translation: about 5 pages

Chinese original: about 7,734 characters

4 Related standards

Standards on related subjects:

GB/T 2999-2025 - Refractory materials - Determination of bulk density of granular materials

GB/T 3001-2017 - Refractory products -- Determination of modulus of rupture at ambient temperature

GB/T 2997-2015 - Test method for bulk density, apparent porosity and true porosity of dense shaped refractory products

JC/T 2598-2021 - Shape and size of refractory bricks for cement recalcining kiln

JC/T 2467-2018 - Sintered hercynite for cement kilns

JC/T 2463-2018 - Test method for adherence characteristics of refractories for cement kiln

5 Classification and status

International classification (ICS): 81.080

Chinese Standard Classification (CCS): Q 40

Prefix JC/T: recommended standard.
