1 Foreword

JC/T 2784-2023 was issued by Ministry of Industry and Information Technology on 20 December 2023 and has been in force since 1 July 2024.

The JC/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 7 pages in English translation.

2 Scope Preview

This standard specifies the terms and definitions of flat glass end stripes, test principles, test equipment and requirements, sample preparation, test procedures, stripe identification and classification, and test reports. This standard is applicable to the end-face stripe detection and classification of flat glass products produced using the float glass process and with a thickness ranging from 0.2mm to 15mm.

JC/T 2784-2023 falls under ICS 81.040.20, in the field of glass and ceramics industries.

This catalogue holds 206 other JC/T standards in that field.

In this catalogue, JC/T standards carry edition years from 1973 to 2026.
