1 Foreword

JC/T 2852-2024 was issued by Ministry of Industry and Information Technology on 24 October 2024 and has been in force since 1 May 2025.

The JC/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 5 pages in English translation.

2 Scope Preview

This standard specifies the test device, environmental conditions, sample requirements, tests and results, and test reports for measuring the sag of ultra-thin glass using the laser ranging method. This standard is applicable to the test of the sag of flat ultra-thin glass, and the sag test of flat glass of other thicknesses can be used as a reference.

JC/T 2852-2024 falls under ICS 81.040.30, in the field of glass and ceramics industries.

This catalogue holds 206 other JC/T standards in that field.

In this catalogue, JC/T standards carry edition years from 1973 to 2026.

3 About this standard

English translation: about 5 pages

Chinese original: about 7,792 characters

4 Related standards

Standards on related subjects:

JC/T 2450-2018 - Glass used in the transparent part of passive building

GB 9962-1999 - Laminated glass

GB/T 9963-1998 - Tempered glass

JC/T 2922-2025 - lmpregnated paper overlays faced decorative fiber cement board

JC/T 2921-2025 - Chemically strengthened glass for screen protection film

JC/T 2838-2024 - Red mud sintered permeable pavement brick

5 Classification and status

International classification (ICS): 81.040.30

Chinese Standard Classification (CCS): Q 34

Prefix JC/T: recommended standard.
