1 Foreword

JC/T 287-2010 was issued by Ministry of Industry and Information Technology on 22 November 2010 and has been in force since 1 March 2011.

It replaces the earlier edition JC 287-1981.

2 Scope

This standard specifies the principles of fiber reinforced plastics void content test, test procedure, , specimens calculated results and test reports. This standard applies to the determination of glass fiber and plastic void content of carbon fiber reinforced. Aramid fiber reinforcement can refer to the use, but does not apply to the determination of plastic void content of fiber reinforced filler.

3 About this standard

Issued by: Ministry of Industry and Information Technology

Adopted international standard: ASTM D2734-2003, NEQ

English translation: about 4 pages

Chinese original: about 6,613 characters

Supersedes the earlier edition JC 287-1981.

4 Classification and status

International classification (ICS): 83.120

Chinese Standard Classification (CCS): Q 23

Prefix JC/T: recommended standard.
