1 Foreword

JC/T 2887-2025 was issued by Ministry of Industry and Information Technology on 10 April 2025 and has been in force since 1 November 2025.

The JC/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 5 pages in English translation.

2 Scope Preview

This standard specifies the quantitative analysis method for residual Y?O? in yttrium-stabilized zirconia powder. This document applies to the quantitative analysis of residual Y?O? in YSZ powder, with an analytical range of mass percentage greater than or equal to 0.00075%.

JC/T 2887-2025 falls under ICS 81.060.30, in the field of glass and ceramics industries.

This catalogue holds 206 other JC/T standards in that field.

In this catalogue, JC/T standards carry edition years from 1973 to 2026.

3 About this standard

English translation: about 5 pages

Chinese original: about 7,771 characters

4 Related standards

Standards on related subjects:

GB/T 30020-2023 - Test method for determing defects of glass - Photoelastic scanning method

GB/T 32061-2015 - Testing method of laminated glass interlayer shear modulus

JC/T 897-2014 - Antiseptic function of antibacterial ceramic

JC/T 2890-2025 - Determination of surface quality for sanitary wares

JC/T 2886-2025 - Test method for linear thermal expansion coefficient of ceramic coatings

JC/T 2883-2025 - Squatting pans

5 Classification and status

International classification (ICS): 81.060.30

Chinese Standard Classification (CCS): Q 30

Prefix JC/T: recommended standard.
