1 Foreword

JC/T 2891-2025 was issued by Ministry of Industry and Information Technology on 10 April 2025 and has been in force since 1 November 2025.

The JC/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 7 pages in English translation.

2 Scope Preview

This standard specifies the principles, test apparatus, sample preparation, test methods, result analysis, and test reports for the test methods of releasing organic pollutants such as formaldehyde, benzene, toluene, xylene, and TVOC from interior decoration and renovation

materials. This document applies to the testing of organic pollutant release from interior decoration and renovation materials.

JC/T 2891-2025 falls under ICS 91.18, in the field of construction materials and building.

This catalogue holds 579 other JC/T standards in that field.

In this catalogue, JC/T standards carry edition years from 1973 to 2026.

3 About this standard

Issued by: Ministry of Industry and Information Technology

English translation: about 7 pages

Chinese original: about 11,154 characters

4 Related standards

Standards on related subjects:

GB/T 8478-2020 - Aluminium windows and doors

JG/T 231-2018 - Technical requirements of building glass skylight system

JC/T 60006-2020 - Specification for construction technical regulations of thin set method for ceramic tile

JC/T 60005-2020 - Technical specification for application of gypsum plaster

JC/T 2279-2014 - Technical code for waterproof roof of glass fibre reinforced cement (GRC)

5 Classification and status

International classification (ICS): 91.18

Chinese Standard Classification (CCS): P 32

Prefix JC/T: recommended standard.
