1 Foreword

JC/T 2892-2025 was issued by Ministry of Industry and Information Technology on 10 April 2025 and has been in force since 1 November 2025.

The JC/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 9 pages in English translation.

2 Scope Preview

This standard specifies the principles, reagents, instruments and equipment, sample preparation, test methods, deodorization efficiency calculation, and test reports for the test methods of typical odor gas purification efficiency of interior decoration and renovation

materials. This document applies to the determination of the purification efficiency of interior decoration and renovation materials with deodorizing functions for odor gases such as ammonia, hydrogen sulfide, and methanethiol.

JC/T 2892-2025 falls under ICS 91.1, in the field of construction materials and building.

This catalogue holds 579 other JC/T standards in that field.

In this catalogue, JC/T standards carry edition years from 1973 to 2026.

3 About this standard

Issued by: Ministry of Industry and Information Technology

English translation: about 9 pages

Chinese original: about 14,163 characters

4 Related standards

Standards on related subjects:

JC/T 1074-2021 - Purificatory Performance of Coatings with Air Purification

JG/T 157-2009 - Putty for exterior wall

GB/T 8625-2005 - Test method of difficult-flammability for building materials

JC/T 2915-2025 - Cement-Based Materials - 3D Printing Terminology and Definitions

JC/T 2281-2025 - Inorganic mixture of recycled aggregate from construction waste for road use

JC/T 2893-2025 - The recovery and grade of wood-plastic composites

5 Classification and status

International classification (ICS): 91.1

Chinese Standard Classification (CCS): Q 10

Prefix JC/T: recommended standard.
