Foreword

JC/T 2941-2026 is a recommended industry standard of the People's Republic of China in the Building Materials sector, approved and issued by the Ministry of Industry and Information Technology on 18 March 2026, with effect from 1 September 2026.

It is administered by the Comprehensive Technical Committee for Building Materials Industry Standardization.

Classification: ICS 13.020.10; CCS Q25.

1 Scope

JC/T 2941-2026 specifies the goal of quantification, the scope, inventory analysis, impact assessment, interpretation of results, critical review, comparability, performance tracking and reporting for the carbon footprint of stone (slag) wool and its products. It applies to the carbon footprint evaluation of stone (slag) wool and its products.

The document is used by manufacturers of stone wool and slag wool insulation products, by sustainability and building product declaration specialists, by reviewers, and by buyers that want carbon footprint information for insulation materials. Its code carries the letter T, so it is a voluntary (recommended) standard and not a mandatory one. It was issued by the Ministry of Industry and Information Technology on 18 March 2026 and takes effect on 1 September 2026. It does not replace an earlier edition. The English translation of the full text lets foreign insulation suppliers, importers and consultants read how the carbon footprint of these mineral wool products is quantified and reported under Chinese industry practice.
