Foreword

JC/T 2956-2026 is a recommended industry standard of the People's Republic of China in the Building Materials sector, approved and issued by the Ministry of Industry and Information Technology on 18 March 2026, with effect from 1 September 2026.

It is administered by the Comprehensive Technical Committee for Building Materials Industry Standardization.

Classification: ICS 91.100.99; CCS Q27.

1 Scope

JC/T 2956-2026 specifies the grading and marking, materials, technical requirements, test methods, inspection rules, packaging, marking, transport and storage of solid waste based cementitious materials for roads. It applies to solid waste based cementitious materials used in road engineering.

The document is used by producers of road binders made from industrial solid waste, by road construction contractors and highway engineers who buy and use them, and by testing laboratories and quality inspectors who check deliveries. Its code carries the letter T, so it is a voluntary (recommended) standard and not a mandatory one. It was issued by the Ministry of Industry and Information Technology on 18 March 2026 and takes effect on 1 September 2026. It does not replace an earlier edition. The English translation of the full text allows foreign material suppliers, researchers and road engineering partners to read how these waste-derived binders are graded, tested and delivered for road works in China.
