Foreword

JC/T 2958-2026 is a recommended industry standard of the People's Republic of China in the Building Materials sector, approved and issued by the Ministry of Industry and Information Technology on 18 March 2026, with effect from 1 September 2026.

It is administered by the Comprehensive Technical Committee for Building Materials Industry Standardization.

Classification: ICS 91.100.10; CCS Q13.

1 Scope

JC/T 2958-2026 specifies the classification and marking, raw materials, general requirements, requirements, test methods, inspection rules, packaging, storage, transport, ordering and delivery of ready-mixed steel slag mortar. It applies to cement-based ready-mixed steel slag mortar used for masonry, plastering and floors.

The document is used by producers of ready-mixed mortar who use steel slag, by steel plants that supply slag, by builders and contractors who buy the mortar for masonry, plastering and floor work, and by testing laboratories that check quality. Its code carries the letter T, so it is a voluntary (recommended) standard and not a mandatory one. It was issued by the Ministry of Industry and Information Technology on 18 March 2026 and takes effect on 1 September 2026. It does not replace an earlier edition. The English translation of the full text lets foreign mortar makers, material suppliers and construction partners read the Chinese provisions directly when specifying, ordering or checking this product.
