Foreword

JC/T 2962-2026 is a recommended industry standard of the People's Republic of China in the Building Materials sector, approved and issued by the Ministry of Industry and Information Technology on 18 March 2026, with effect from 1 September 2026.

It is administered by the Comprehensive Technical Committee for Building Materials Industry Standardization.

Classification: ICS 13.060.25; CCS P41.

1 Scope

JC/T 2962-2026 specifies the calculation method for the water intake norm of building waterproof materials, the water intake norm itself, and the requirements for norm management. It applies to water management in enterprises that produce waterproofing membranes and waterproofing coatings.

The document is used by manufacturers of waterproofing membranes and coatings, by water and energy managers in those plants, by supervisors who review water use, and by consultants who prepare water audits. Its code carries the letter T, so it is a voluntary (recommended) standard and not a mandatory one. It was issued by the Ministry of Industry and Information Technology on 18 March 2026 and takes effect on 1 September 2026. It does not replace an earlier edition. The English translation of the full text helps foreign waterproofing producers, equipment suppliers and project partners understand how the water intake norm is calculated and managed in this branch of the building materials industry in China.
