Foreword

JC/T 2963-2026 is a recommended industry standard of the People's Republic of China in the Building Materials sector, approved and issued by the Ministry of Industry and Information Technology on 18 March 2026, with effect from 1 September 2026.

It is administered by the Comprehensive Technical Committee for Building Materials Industry Standardization.

Classification: ICS 03.100.50; CCS P01.

1 Scope

JC/T 2963-2026 specifies the evaluation index system and requirements, the evaluation method and procedure, and the judgement for the evaluation of water-saving enterprises in the waterproof material industry. It applies to the water-saving evaluation of enterprises that produce waterproofing membranes and waterproofing coatings.

The document is used by waterproofing manufacturers that want to be assessed as water-saving enterprises, by evaluators and assessment bodies, by water and environmental managers in the plants, and by consultants who prepare enterprises for evaluation. Its code carries the letter T, so it is a voluntary (recommended) standard and not a mandatory one. It was issued by the Ministry of Industry and Information Technology on 18 March 2026 and takes effect on 1 September 2026. It does not replace an earlier edition. The English translation of the full text lets foreign producers, investors and partners in the waterproofing sector read how water saving performance is judged in China.
