Foreword

JC/T 2966-2026 is a recommended industry standard of the People's Republic of China in the Building Materials sector, approved and issued by the Ministry of Industry and Information Technology on 18 March 2026, with effect from 1 September 2026.

It is administered by the Building Materials Industry Comprehensive Technical Committee for Standardization.

Classification: ICS 91.100.10; CCS Q12.

1 Scope

JC/T 2966-2026 specifies the classification, technical requirements, test methods, inspection rules, packaging, marking, transport and storage of fly ash from municipal solid waste incineration that is used in concrete. It applies to this incineration fly ash when it is supplied for concrete and concrete products that contain no steel reinforcement. The document therefore treats the ash as a material delivered for concrete production, from the way it is categorised to the way it is checked, packed, labelled, moved and kept before use.

Concrete producers, operators of waste incineration plants that supply the ash, testing laboratories and buyers of the material can use it as a common basis for specifying and checking the product. It is a voluntary industry standard (code with /T), approved by the Ministry of Industry and Information Technology and prepared under the Building Materials Industry Comprehensive Technical Committee for Standardization. It was issued on 18 March 2026 and takes effect on 1 September 2026.
