1 Foreword

JC/T 60004-2019 was issued by Ministry of Industry and Information Technology on 24 December 2019 and has been in force since 1 July 2020.

The JC/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 17 pages in English translation.

2 Scope Preview

This standard specifies the terms and definitions, refractory design, masonry construction, use and maintenance of refractories for glass kilns. This standard applies to refractory materials for flat glass melting furnaces, not all-electric melting furnaces.

JC/T 60004-2019 falls under ICS 81.080, in the field of glass and ceramics industries.

This catalogue holds 206 other JC/T standards in that field.

In this catalogue, JC/T standards carry edition years from 1973 to 2026.

3 About this standard

Sector: Building Materials Industry Standard (Recommended)

Issued by: Ministry of Industry and Information Technology

English translation: about 17 pages (approximate)

Chinese original: about 26,247 characters

4 Related standards

Standards on related subjects:

GB/T 38978-2020 - Refractory products-Determination of stress-strain (three-point bending method)

GB/T 36134-2018 - Monolithic (unshaped) refractory products -- Determination of resistance to explosive spalling during heating

GB/T 51132-2015 - Code for construction and quality acceptance of industrial non-ferrous metallic piping engineering

JC/T 2598-2021 - Shape and size of refractory bricks for cement recalcining kiln

JC/T 2467-2018 - Sintered hercynite for cement kilns

JC/T 2463-2018 - Test method for adherence characteristics of refractories for cement kiln

5 Classification and status

International classification (ICS): 81.080

Chinese Standard Classification (CCS): Q 40

Prefix JC/T: recommended standard.
