Foreword

JC/T 60036-2026 is a recommended industry standard of the People's Republic of China in the Building Materials sector, approved and issued by the Ministry of Industry and Information Technology on 11 March 2026, with effect from 1 September 2026.

It is administered by the Building Materials Industry Comprehensive Technical Committee for Standardization.

Classification: ICS 91.120.20; CCS P32.

1 Scope

This technical specification sets out sound insulation requirements for civil buildings that are newly built, rebuilt or extended. It applies to six types of building: residential buildings, schools, hospitals, hotels, office buildings and commercial buildings. The document deals with the technical requirements for sound insulation in these building types, so that the acoustic separation between spaces can be specified, designed and checked against a common reference.

Architects and acoustic designers, building developers, construction contractors, building material suppliers and inspection or acceptance bodies can use the specification when planning and verifying sound insulation in the buildings it covers. It is a voluntary industry standard (code with /T), approved by the Ministry of Industry and Information Technology and prepared under the Building Materials Industry Comprehensive Technical Committee for Standardization. It was issued on 11 March 2026 and takes effect on 1 September 2026.
