Foreword

JC/T 60038-2026 is a recommended industry standard of the People's Republic of China in the Building Materials sector, approved and issued by the Ministry of Industry and Information Technology on 11 March 2026, with effect from 1 September 2026.

It is administered by the Building Materials Industry Comprehensive Technical Committee for Standardization.

Classification: ICS 91.100.30; CCS P01.

1 Scope

JC/T 60038-2026 is a technical specification for the pumping of concrete used in the production of concrete poles. It deals with concrete pumping in the manufacture of poles, that is, with moving the concrete by pump during pole production. The document is written for this particular production setting and does not address concrete pumping in general construction work.

Manufacturers of concrete poles, concrete suppliers to pole plants, equipment operators, quality control staff and testing laboratories can use it as a technical reference for pumping concrete in pole production. It is a voluntary industry standard (code with /T), approved by the Ministry of Industry and Information Technology and prepared under the Building Materials Industry Comprehensive Technical Committee for Standardization. It was issued on 11 March 2026 and takes effect on 1 September 2026. The specification does not replace any earlier edition.
