What this standard covers

This standard specifies the determination methods of loss on ignition, silicon dioxide, aluminum oxide, ferric oxide, titanium dioxide, calcium oxide, magnesium oxide, potassium oxide, sodium oxide and chromium oxide of siliceous glass raw materials. This standard applies to the chemical composition analysis of siliceous glass raw materials such as silica, sandstone, and silica sand.

Document data

Chinese classification (CCS): Q30.

Estimated length of the Chinese original: 26,270 words.
