What this standard covers

This standard specifies the classification and marking, requirements, test methods, inspection rules, marking, packaging, transportation, and storage of mechanical toilet flushing valves. This document applies to flushing valves for toilets (both large and small) installed on cold water supply pipelines within building facilities, under a static water pressure not exceeding 0.6 MPa. This document does not apply to non-contact flushing valves.

Document data

International classification (ICS): 91, 91.140, 91.140.70.

Chinese classification (CCS): Q30.

Estimated length of the Chinese original: 13,125 words.

Supersedes the earlier edition JC/T 931-2003.
