## 1 Foreword

JC/T 961-2005 was issued by Ministry of Industry and Information Technology on 14 February 2005 and has been in force since 1 July 2005.

The JC/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 8 pages in English translation.

## 2 Scope Preview

This standard specifies: Cement abrasion testing machine (referred to as abrasion machine) structure, technical requirements, test methods, inspection rules, marking and packaging content. This standard applies to: the test specimens of cement mortar and other

building materials wear testing machine.

JC/T 961-2005 falls under ICS 91.110.10, in the field of construction materials and building.

This catalogue holds 579 other JC/T standards in that field.

In this catalogue, JC/T standards carry edition years from 1973 to 2026.

## 3 About this standard

Sector: Building Materials Industry Standard (Recommended)

Issued by: Ministry of Industry and Information Technology

English translation: about 8 pages (approximate)

Chinese original: about 7,758 characters

## 4 Related standards

Standards on related subjects:

GB/T 750-2024 - Test method for autoclave expansion of cement

GB/T 748-2023 - Sulfate resistance portland cement

JC/T 1083-2008 - Test method for compatibility of cement and water-reducing agent

JC/T 421-2023 - Test method for abrasion resistance of cement mortar

JC/T 960-2022 - Cement mortar strength automatic pressure testing machine

JC/T 956-2014 - Apparatus for blame method

## 5 Classification and status

International classification (ICS): 91.110.10

Chinese Standard Classification (CCS): Q 11

Prefix JC/T: recommended standard.
