### What this standard covers

This standard specifies the forced flow of surface air coolers and air heaters (hereinafter referred to as heat) performance test methods and requirements. This standard applies to water as the medium of air cooler (or air heater) and steam as the medium of the air heater. For ethylene drunk with saline or air cooler solution for the medium can also refer to this standard test. This standard does not apply to the refrigeration system evaporator and condenser.

### Document data

International classification (ICS): 91.140.30.

Chinese classification (CCS): P48.

Estimated length of the Chinese original: 16,112 words.

Supersedes the earlier edition GB 10223-1988.
