What this standard covers

This standard specifies the VAV terminal units (hereinafter referred to as VAV terminal unit) terms and definitions, classification and marking, requirements, test methods, inspection rules, marking, packaging, transportation, storage and so on. This standard applies to installed in the air duct system for air traffic distribution and parameter control of indoor air conditioned terminal equipment. Does not apply to the system installed in the air duct out of the room location and the fixed vane outlet end of the air distribution device.
