### What this standard covers

This standard specifies the equipment for the compressive strength test of extruded concrete, the preparation and maintenance of test pieces, and the compressive strength test. This standard is applicable to the compressive strength test of extruded concrete with a Weibul consistency of 21s~30s.

### Document data

International classification (ICS): 91.100.30.

Chinese classification (CCS): Q13.

Estimated length of the Chinese original: 7,778 words.

Supersedes the earlier edition JG/T 3023-1995.
