JGJ

**INDUSTRY STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

JGJ 227-2011

**Technical specification for low-rise cold-formed thin-walled
steel buildings
(English Translation)**

Issued on: January 28, 2011

Implemented on: December 1, 2011

**Issued by: Ministry of Housing and Urban-Rural Development of the
People's Republic of China**

Table of Contents

1 General provisions	8
2 Terms and symbols	8
2.1 Terms	8
3 Materials and design indices	14
3.1 Material selection	14
3.2 Design indices	16
4 Basic design requirements	17
4.1 Design principles	17
4.2 Loads and actions	18
4.3 Architectural design and structural layout	19
4.4 Allowable value for deformation of structures and structural members	22
4.5 General requirements for detailing	23
5 Structural analysis	26
5.1 Calculation principles of structures	26
5.2 Analysis of horizontal load effects	27
6 Calculation of members and connections	29
6.1 Calculation of members	29
6.2 Calculation and detailing of connections	36
7 Floor systems	37
7.1 General requirements	37
7.2 Detailing of floor systems	38
8 Wall framing systems	45
8.1 General provisions	45
8.2 Calculation of wall framings	47
8.3 Requirements for detailing	51
9 Roof systems	56
9.1 General requirements	56
9.2 Calculation of roof systems	57
9.3 Requirements for detailing of roof joints	59
10 Fabrication, coating, erection and acceptance	61
10.1 Fabrication	61
10.2 Coating works of anticorrosion	61

10.3 Erection	62
10.4 Final acceptance	63
11 Heat preservation and insulation, damp proof	65
11.1 General requirements	65
11.2 Detailing of heat preservation and insulation	66
11.3 Detailing of damp proof	66
12 Fireproofing	67
13 Testing	68
13.1 General requirements	68
13.2 Performance testing	68
Appendix A Test method on design shear strength of screws	71
Appendix B Test method on shear strength of wall framings	74
Appendix C Calculation on distortional buckling stress of C shape members	77
Explanation of wording in this specification	80
List of quoted standards	81

Foreword

In accordance with the requirements of the original Ministry of Construction of the Notice on the Printing and Issuing of the Establishment and Revision Plan of 2007 Engineering Building Standards (Batch 1) (JB [2007] No.125), the specification compilation group compiles this specification through extensive investigation and study, carefully summarizing practical experiences, making reference with relevant international standards and advanced foreign standards, AND based on the wide solicitation of opinions.

The provisions indicated in boldface in this specification are mandatory, which must be strictly enforced.

As for this specification, the Ministry of Housing and Urban-Rural Development of the People's Republic of China is responsible for the management and the interpretation of the mandatory provisions, AND the China Building Standards Design Institute is responsible for the interpretation of specific technical content. Any comments or suggestions during the implementation of this specification please send to China Building Standard Design Institute (No.2 International Building, No.9, Shouti South Road, Haidian District, Beijing 100048, China).

The responsible drafting organizations of this specification. China Building Standard Design and Research Institute the participating drafting organizations of this specification.

Technical specification for low-rise cold-formed thin-walled steel buildings

1 General provisions

1.0.1

This specification is established for the purposes of standardizing the design, fabrication, erection and acceptance of low-rise cold-formed thin-walled steel buildings, in order to
