What this standard covers

This standard applies to RF and microwave attenuation value transfer measuring instruments, which includes the amount from the main base, radio frequency and microwave attenuation baseline measurement apparatus, radio frequency and microwave attenuation measurement apparatus until the RF and microwave attenuation values ??between measuring instruments work transitive relation, value transfer value transfer methods, and the uncertainty of when the requirement.

Document data

International classification (ICS): 17.220.

Chinese classification (CCS): A56.

Estimated length of the Chinese original: 8,870 words.

Supersedes the earlier edition JJG 2010-1987.
