What this standard covers

This standard applies to newly manufactured, repaired using the DC resistance and impedance bridge, the upper range of its resistance measurement equal to or greater than $10 \times 6 \times 10^3$ Ω , grade index of 0.01 to 10 test bridge. This procedure does not apply to automatic or semi-automatic impedance bridge, the current comparative bridge, and the use made of the principle of non-electrical impedance meter bridge and insulation resistance meter test.

Document data

Chinese classification (CCS): A55.

Estimated length of the Chinese original: 12,185 words.
