1 Scope

This Part of JR/T 0025 describes the application of contactless integrated circuit card and provides the requirements for the contactless payment application (qPBOC) of the fast debit/credit.

This Part is applicable to the financial contactless integrated circuit card issued or received by the banks. The using objects are mainly the relevant departments for such card design, manufacture, management, issuance and acceptance and those for the development, integration and maintenance of the application system.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest versions of the normative documents (including all the amendments) are applicable to this document.

JR/T 0025.3 China financial integrated circuit card specifications - Part 3.

Application independent ICC to terminal interface requirements

JR/T 0025.4 China financial integrated circuit card specifications - Part 4.

Debit/credit application specifications

JR/T 0025.5 China financial integrated circuit card specifications - Part 5.

Debit/credit application card specifications

JR/T 0025.6 China financial integrated circuit card specifications - Part 6.

Debit/credit application terminal specifications

JR/T 0025.7 China financial integrated circuit card specifications - Part 7.

Debit/credit application card security specifications

JR/T 0025.8 China financial integrated circuit card specifications - Part 8.

Contactless specification independent of application

JR/T 0025.10 China financial integrated circuit card specifications - Part 10.

Debit/credit card personalization guide

JR/T 0025.11 China financial integrated circuit card specifications - Part 11.

Contactless integrated circuit card communication specifications

JR/T 0025.13 China financial integrated circuit card specifications - Part 13.Low- value payment specifications based on debit/credit application

JR/T 0025.17 China financial integrated circuit card specifications - Part 17.

Enhanced debit/credit application security specifications

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

3.1 Application file locator

Used to indicate application related file position and recording range.

3.2 Application interchange profile

To demonstrate the card-supporting functions.

3.3 Card

In this Part, the "card" refers to the consumer device interchanging with the payment terminal and equipped with the contactless payment application.

The term "card", originally, refers to the payment card with the same size as the traditional credit cards, but in this Part, it refers to any consumer device capable of operation processing through the contactless interface (such as mobile telephone or PDA).
