**INDUSTRY STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

JR/T 0025.3-2013

**China financial integrated circuit card specifications - Part 3:
Specification on application independent ICC to terminal
interface requirements
(English Translation)**

Issued on: February 5, 2013

Implemented on: February 5, 2013

Issued by: the People's Bank of China

Table of Contents

Foreword	4
Introduction	6
1 Scope	7
2 Normative references	7
3 Terms and definitions	8
4 Symbols and abbreviations	12
5 Electromechanical interface	16
5.1 Low voltage IC card transplant	16
5.2 Mechanical properties of IC card	17
5.3 Electrical characteristics of IC card	18
5.4 Mechanical properties of terminals	22
5.5 Electrical characteristics of terminal	24
6 Card operation process	28
6.1 Normal card operation process	29
6.2 Abnormal termination of transaction process	32
7 Physical transmission of characters	32
7.1 Bit duration time	32
7.2 Character frame	33
8 Answer to reset	34
8.2 IC card loopback character during ATR period	35
8.3 Character definition	36
8.4 Behaviors of the terminal during ATR process	44
8.5 Answer to reset - terminal process	45
9 Transport protocol	46
9.1 Physical layer	47
9.2 Data link layer	47
9.3 Terminal transport layer	60
9.4 Application layer	67
10 Files	69
10.1 File structure	69
10.2 File reference	70
11 Command	71

11.1 Message structure	71
11.2 Read record C-APDU / R-APDU	73
11.3 Select C-APDU / R-APDU	74
12 Application selection	76
12.1 Overview of application selection	76
12.2 IC card data used in application selection	78
12.3 Establishing the candidate list	80
13 Reservation and use of AID	87
13.1 Structure and length of the application identifier (AID)	87
13.2 Overall code of application provider identifier (AID)	88
13.3 Dedicated application identifier extension (PIX) code	88
13.4 Definition of application type code	88
Annex A (Informative) Example of using T= 0 protocol exchange	90
Annex B (Normative) Data element sheet	93
Annex C (Informative) Example of directory structure	96
Bibliography	97

1 Scope

This part of JR/T 0025 specifies content on application independent IC card and terminal interface, including electromechanical interface of card, card operation process, physical transmission of characters, answer to reset, transport protocols, files, commands, and application selection mechanism.

This part applies to IC card and terminal manufacturers, system designer of payment system, and the personnel of developing IC card financial application.
