### What this standard covers

This standard specifies the encoding rules and interoperability technical architecture for payment barcodes, as well as the message elements and security requirements for barcode payments. It applies to the design, development, and operation of software, hardware products, and information systems used for barcode payments by banking financial institutions, clearing institutions, operators of digital RMB financial infrastructure, and non-bank payment institutions.

### Document data

International classification (ICS): 35.240.40.

Chinese classification (CCS): A11.

Estimated length of the Chinese original: 11,198 words.

Supersedes the earlier edition JR/T 0245-2021.
