What this standard covers

This standard specifies the most frequently used time series data, classifies the investment research master data, designs a standardization scheme for the expression of master data dimensions, and generates a set of time series data indicator reference model frameworks that are easy to produce and circulate. This standard applies to the construction of indicator data abstract models and investment research data interaction work in financial institutions in investment research scenarios.

Document data

International classification (ICS): 03.060.

Chinese classification (CCS): A11.

Estimated length of the Chinese original: 35,311 words.
