### What this standard covers

This standard specifies the data specifications for cross-chain docking between local business chains and regulatory chains in regional equity markets, including cross-chain data classification, subject object information requirements, account object information requirements, product object information requirements, transfer report object information requirements, registration object information requirements, fund settlement object information requirements, disclosure object information requirements, financial statement object information requirements, and regulatory object information requirements. This standard applies to the construction or service operation of local business systems for securities and futures institutions in regional equity markets that carry out local business chains and docking with local business chains.
