What this standard covers

This standard specifies basic data on urban flooding risk, the compilation and application of urban flooding risk maps, early warning technologies and applications for urban flooding disasters, and insurance service models for urban flooding disasters. This standard applies to insurance businesses related to urban flooding disasters, supporting insurance companies in risk management, disaster prevention and mitigation, and claims services during the underwriting period. It guides insurance companies in effectively carrying out urban flooding monitoring, early warning, and risk management, and standardizes insurance business indicators and early warning risk information application models.
