What this standard covers

This standard specifies a set of reference guidelines for establishing an integrated R&D and operations (DevOps) system in the securities and futures industry. It covers normative references, terms and definitions, abbreviations, an overview, and systems for requirements management, technical implementation, quality management, technical operations management, security management, performance measurement, and integrated collaboration. It serves as a guiding document for relevant institutions establishing integrated R&D and operations systems, providing systematic and standardized reference criteria for consulting, assessment, certification, and system improvement activities.

Document data

International classification (ICS): 03.060.

Chinese classification (CCS): A11.

Estimated length of the Chinese original: 79,783 words.
