What this standard covers

This standard specifies the classification of data exchanged between the ministry-level and provincial-level transportation statistics, analysis, monitoring, and investment plan management information systems, as well as the data exchange content of transportation statistics reports, highway transportation volume monitoring, and transportation investment plans. This standard applies to data sharing and exchange of transportation statistics, analysis, monitoring, and investment plan management information systems at the ministry-level and provincial-level. It is used for reference in data sharing and exchange of transportation statistics, analysis, monitoring, and investment plan management information systems at other levels.

Document data

Chinese classification (CCS): R07.
