What this standard covers

This standard specifies the communication mode, security strategy, protocol message format, data entity format and other requirements of the data exchange and information sharing interface of the 12328 transportation service supervision hotline system. This standard applies to the construction and application of the 12328 transportation service supervision hotline system, and is used as a reference for data exchange and information sharing between the 12328 transportation service supervision hotline system and other hotline systems and industry-related application systems. The data content of data exchange and information sharing between the various business systems, portal websites, mobile clients and other subsystems within the 12328 transportation service supervision hotline system refers to this standard, but the communication method is not limited to Internet services (WebService).
