What this standard covers

This standard specifies the treated water volume and water quality, system composition and layout, treatment process, testing and control, daily operation and maintenance management of the membrane bioreactor treatment system of the sewage treatment facility in the road service area. This standard applies to sewage treatment facilities in highway service areas where membrane bioreactors are the main treatment process. The sewage treatment facilities of other auxiliary facilities of the highway using the membrane bioreactor as the main treatment process can be referred to.

Document data

International classification (ICS): 03.220.20; 13.020.

Chinese classification (CCS): R04.

Estimated length of the Chinese original: 17,172 words.
