What this standard covers

This standard specifies the specific requirements for energy-saving operation and operation of large port belt conveyor system process control and its ancillary facilities. This standard is applicable to port belt conveyors in which the materials need to be transferred by 2 sets and more than 2 belt conveyors in the loading and unloading process of large dry bulk terminals. The total length of the conveyors is more than 1000m and the designed annual throughput is 10 million tons. Machine system.

Document data

International classification (ICS): 53.040.01.

Chinese classification (CCS): R46.
