What this standard covers

This standard specifies the test method for the lateral side slip of the steering wheel of the steering system, the maximum free rotation of the steering wheel, the knuckle arm crack, the steering rod crack, and the looseness of the steering ball pin assembly. This standard applies to the non-disintegration test of automotive steering systems.

Document data

International classification (ICS): 43.180.

Chinese classification (CCS): R16.

Estimated length of the Chinese original: 9,970 words.
