What this standard covers

This standard specifies the dimensions and maximum allowable total mass, performance and configuration requirements for van or containerized trucks, articulated trains and truck trains engaged in international road freight transport. This standard applies to the carriage of international road cargo between the People's Republic of China and the European Union, the Republic of Kazakhstan, the Islamic Republic of Pakistan, the Kyrgyz Republic, the Republic of Tajikistan, the Russian Federation, the Lao People's Democratic Republic, the Socialist Republic of Vietnam and Mongolia. Or containerized trucks, articulated trains and truck trains, and vehicles engaged in international road freight transport with other countries may refer to the use.

Document data

International classification (ICS): 43.020.

Chinese classification (CCS): R13.

Estimated length of the Chinese original: 7,740 words.
