What this standard covers

This standard specifies the structure, specifications and dimensions, technical requirements, test methods, inspection rules, and requirements for marking, packaging, transportation and storage of self-floating rubber drain pipes. This standard applies to the production, inspection and use of self-floating tubes for the transport of mixtures of seawater, fresh water and silt, excavation and sand. This standard does not apply to self-floating pipes that transport gravel, flaky weathered rock and coral reefs.

Document data

International classification (ICS): 47.020.99.

Chinese classification (CCS): U30.

Estimated length of the Chinese original: 13,161 words.
