1 Foreword

JT/T 1261-2019 is issued by Ministry of Transport.

The JT/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 24 pages in English translation.

2 Scope Preview

This standard specifies the material requirements for port dumpers, the repair techniques for dumpers, wheel pickers, wheel grippers, feeding systems, steel structures, special parts, general parts, hydraulic systems and components, electrical equipment and safety protection devices requirements, as well as the assembly and installation of port dumpers, and the requirements for commissioning and acceptance. This standard is applicable to the rotary single-car, double-car, three-car and four-car dumper system for unloading and unloading of railway gondolas. The gondolas are fixed by hydraulic drive. Other types of dumper systems can also be used for reference.

JT/T 1261-2019 falls under ICS 53.020.20, in the field of materials handling equipment.

This catalogue holds 14 other JT/T standards in that field.

In this catalogue, JT/T standards carry edition years from 1991 to 2026.

3 About this standard

Sector: Highway & Transportation Industry Standard (Recommended)

Issued by: Ministry of Transport

English translation: about 24 pages (approximate)

Chinese original: about 35,353 characters

4 Related standards

Standards on related subjects:

JT/T 1493-2024 - Safety requirements for boarding bridges at cruise terminals

JT/T 1492-2024 - Safety requirements for continuous bulk ship loaders

JT/T 1262-2019 - Technical specifications requirements for testing of jib cranes
