What this standard covers

This standard specifies the material requirements for port floating cranes, metal structures, special parts, general parts, hydraulic systems, lubrication systems, electrical equipment and safety protection devices, repair, replacement and assembly requirements, and tests after repair or replacement. This standard is applicable to floating cranes that operate in sheltered waters of ports or offshore. Other types of floating cranes can also be used as reference.

Document data

International classification (ICS): 53.020.20.

Chinese classification (CCS): R46.

Estimated length of the Chinese original: 21,288 words.
