What this standard covers

This standard specifies the basic requirements, XML message format, and platform file message format for sea-rail combined transport demand truck messages. This standard is applicable to the exchange of messages required by the ship to the relevant units of the port and the railway by the shipper during the port operation of the sea-rail combined transport. Related types of information system construction and electronic data exchange can be used as reference.

Document data

International classification (ICS): 03.220.01.

Chinese classification (CCS): S93.

Estimated length of the Chinese original: 47,455 words.
