What this standard covers

This standard specifies the basic test requirements, test environment and test item requirements for the electrical characteristics and communication protocol detection of the non-contact read-write terminal of the IC card of urban public transportation. This standard applies to the testing of the electrical characteristics and communication protocols of non-contact read-write terminals specified in JT/T 978.

Document data

International classification (ICS): 03.220.20; 35.240.15.

Chinese classification (CCS): R07.

Estimated length of the Chinese original: 25,921 words.
