What this standard covers

This standard specifies the general requirements for side scan sonar measurement, system configuration, pre-test preparation, data acquisition, data processing and data sorting, technical summary, inspection and acceptance, and data submission requirements. This standard applies to sea sweeping surveys in coastal ports and waterways, and other waters can be used as a reference. This standard does not apply to the collection and processing of backscatter data for multi-beam systems.

Document data

International classification (ICS): 03.220.40.
