What this standard covers

This standard specifies the general principles for the quota verification of automobile maintenance man-hours, the vehicle classification method, the basic conditions, and the composition, measurement, quota accounting and quota compilation requirements of automobile maintenance man-hours. This standard is applicable to guiding the verification and compilation of the man-hour quotas of automobile whole vehicle maintenance enterprises, comprehensive minor repairs and special maintenance businesses. Maintenance enterprises (businesses) use it as a reference for the calculation of the maintenance workload of employees.
