What this standard covers

This standard specifies the classification, model, structural form and specification, technical requirements, test methods, inspection rules, and marking, packaging, transportation and storage requirements of anchors, clamps and connectors for prestressed steel strands for highway bridges. This standard applies to the production, inspection and use of anchors, clamps and connectors for steel strands with a nominal diameter of 15.2 mm for prestressed concrete structures of highway bridges. This standard does not apply to cables and slings.

Document data

Chinese classification (CCS): P28.

Estimated length of the Chinese original: 32,346 words.
