What this standard covers

This standard specifies the sampling method for treated oily sewage and domestic sewage in ship machinery spaces, including sampling plans, information collection, sample collection, sampling records, sampling safety protection, quality assurance and control. This standard applies to the sampling of oily sewage treated by oil-water separation devices in ship machinery spaces and domestic sewage treated by domestic sewage treatment devices discharged by ships into environmental waters in the inland waters of the People's Republic of China and other sea areas under its jurisdiction.
