What this standard covers

This standard specifies the overall principles of sampling methods for quality inspection of highway traffic safety facilities, factory acceptance and site sampling procedures, as well as supervision and spot inspection procedures. This standard applies to acceptance inspection and supervision and spot inspection of highway traffic safety facilities such as corrugated steel guardrails, traffic sign boards and supports, road marking paint, contour markers, anti-glare panels, and isolation fences.

Document data

Chinese classification (CCS): P66.
