What this standard covers

This standard specifies the product classification, technical requirements, test methods, inspection rules, and requirements for marking, packaging, transportation and storage of reinforced concrete rust inhibitors. This standard applies to the production, inspection and use of reinforced concrete rust inhibitors for highway engineering. Reinforced concrete rust inhibitors for water transport, port, water conservancy, railway and other projects can be used as reference.

Document data

International classification (ICS): 93.080.20.

Chinese classification (CCS): P66.

Estimated length of the Chinese original: 12,134 words.

Supersedes the earlier edition JT/T 537-2004.
