What this standard covers

This standard specifies the basic requirements for the maintenance and repair of digital selective calling systems for coastal (river) radio stations, as well as the maintenance and repair technical requirements for intermediate frequency/high frequency transmitting equipment, intermediate frequency/high frequency receiving equipment, very high frequency transceiver equipment, antenna feeder subsystem, digital selective calling application subsystem, transmission subsystem, and power supply and distribution electronic system. This standard applies to the maintenance and repair of equipment and facilities for medium-frequency/high-frequency/VHF digital selective calling systems at coastal (river) radio stations.

Document data

International classification (ICS): 47.020.70.

Chinese classification (CCS): R29.

Supersedes the earlier edition JT/T 624-2005.
